Introduction

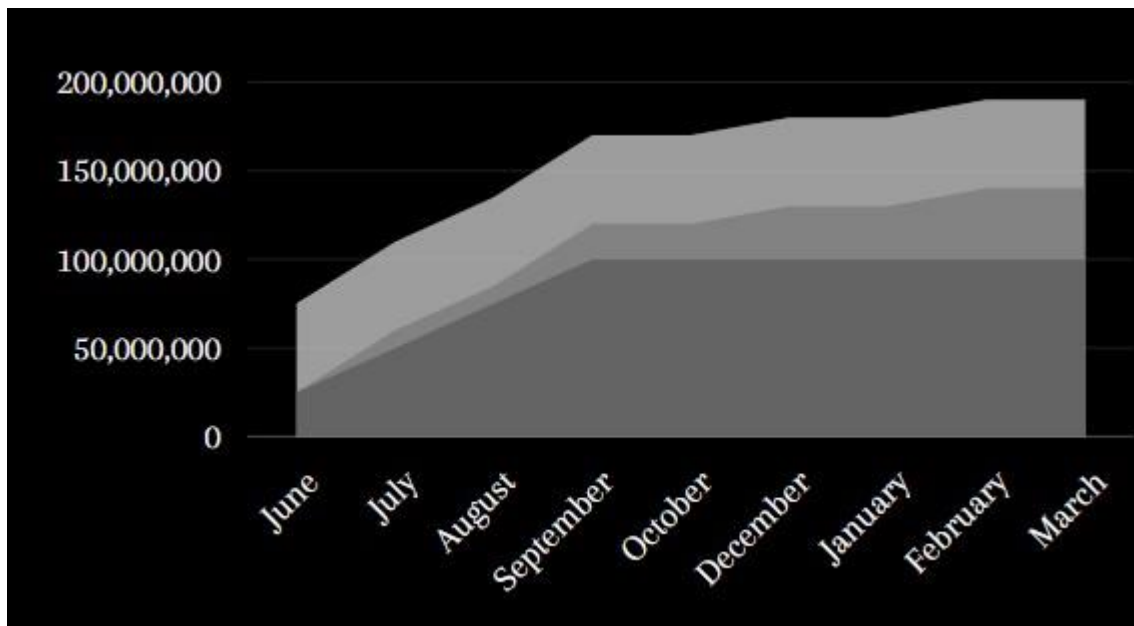

Content subscription is a vastly growing market with over \$20 Billion in sales worldwide. Currently, content creators use Fiat markets to facilitate the sale of their subscriptions, leading to complicated tax liabilities, and subject to the whims of the platforms themselves. We aim to separate the claiming of earnings and the subscription of content from Fiat currency in order to give users more power over their earnings. By creating a content sharing site in a distributed fashion, we are allowing creators and subscribers dictate how they want the platform to perform.

Economy assumptions

Token function. The **Cryptononlyfanz** token (COF) will be the primary token of the content sharing and subscription website [Cryptononlyfanz.com](https://cryptononlyfanz.com). The token will serve four primary functions

1. Redistribute earnings to holders
2. Generate revenue for marketing
3. Generate revenue for development
4. Reward content creators on the Cryptononlyfanz platform

Token supply. COF will have a limited supply of 10 BILLION tokens.

Breakdown of the token release schedule, by month and allocation

Token usage and development. During product development IDO funds will be used for the following purposes

- Marketing
- Advisors
- Development
- Listing fees
- Listing applications
- Airdrops
- Giveaways
- Content creator incentives

Cryptononlyfanz platform token utility. Content creators will be able to host their own content, shared publicly or privately with their subscribers, and COF tokens can be used to purchase subscriptions, one-time purchases, or be held to gain access to premier events and exhibitions by content creators. While the COF token will be used as a form of payment, the platform will also support various other Cryptocurrency such as BTC, ETH, USDT, LITE and more for tipping creators. However all purchases will be completed using COF tokens.

Content creators can then claim a weekly release of their COF tokens for conversion to crypto of their choice, with a portion going to the burn address to limit price impact.

Users will purchase COF tokens from any Centralized Exchange (CEX) or Distributed Exchange (DEX) that contains COF liquidity. Liquidity can be provided by anyone who holds COF tokens, and liquidity provision will be rewarded through a staking mechanism that will distribute additional COF tokens as well as passes to different content creators.

Finally, subscribers will be able to support content creators through the purchase of uniquely minted NFTs, created by content creators, and will offer long-term access to various events and promotions as decided by the content creator.

COF token fee structure & token burning. Each transaction of the COF token will have the following distributions

1. 3% to holders of the COF token
2. 3% to a Marketing wallet, held in a multi-sig safe
3. 1% to a Liquidity wallet, held in a multi-sig safe

In addition, withdrawals by content creators of their tokens will result in a 10% Burn to be paid by the Cryptononlyfanz platform to maintain the health of the token supply and price.

Token generation event and financials

Basics:

└ Ticker:	COF
└ Campaign start date:	07.01.2021
└ Campaign end date:	07.05.2021
└ Campaign denomination currency:	USD
└ Accepted currencies:	USDT,ETH,BTC,LITE
└ Jurisdiction:	United States
└ Eligibility:	All
└ Compliance:	None
└ Campaign waves:	2

Token Generation Event Summary:

└ Sale type:	Dex offering
└ Softcap:	1.5 MM USD
└ Hardcap:	3 MM USD
└ Campaign token amount:	10,000,000,000 COF
└ Campaign allocation:	Locked into validator pool
